How Harmonize for Health's Bioresonance Rental Program Works

It's very simple to administer the therapy with a Rayocomp PS 10 basic combined with a blanket detector, the Green Cards that have been generated with a therapy program specific to your body's needs via the body scan results. *See detailed instruction sheet for the use of your rental equipment.*

The Initial body scan provides the first 68 healing frequencies your body needs, known as the Body Fingerprint, followed by the Checkup Test and a Detailed Test. Put all this together and you have a Harmonizing therapy program based on those same body needs.

Over a six month period you will have five, one hour follow up appointments, giving you a total of six body scans with an updated therapy plan each month, peeling off disturbances within your body layer by layer, allowing your body to heal naturally.

Harmonization should be performed two to three times per week (the usual frequency for chronic illness) or in some cases daily (for acute events) depending on the therapy plan. Expect communication throughout your six month therapy plan to monitor progress, answer questions and make adjustments to your therapy plan as needed.
